The head of state got acquainted with perspective weapons models

On May 22, during a visit to the pilot-test site of one of the enterprises that are part of the State authority for military industry of the Republic of Belarus system, President of the Republic of Belarus Alexander Lukashenko got acquainted with promising models of missile weapons that have already been completed or are being conducted in various directions. They concern the sphere of creating and producing competitive domestic innovative models, and also as modernizing existing weapons.

The President of the Republic of Belarus got acquainted with perspective models of missile weapons and heard a report from Director Y.N. Chorny on developments that are being carried out at the enterprise in various areas.
