Diversification towards civil and commercial markets

Business diversification can become a tool that will significantly increase the income and competitiveness of the Republican production unitary enterprise "Precise Electro-mechanics Plant" (hereinafter referred to as the enterprise).

The production potential of the enterprise includes a multi-functional universal workshop with infrastructure and a pilot plant that provides high-precision machining of metals and alloys, including high hardness.

The existing production capacity allows not only to perform work on the production of military products, but also fulfill orders from third-party businesses (organizations) in part:

- metalworking, manufacturing of precision parts and nodes according to customer drawings;
- development and manufacturing of parts and nodes according to the technical requirements of customers.

The enterprise cooperates with a number of companies that include: Belarusian national technical University, A. V. Lykov Institute of heat and mass transfer of the national Academy of Sciences of Belarus, OJSC "NPO Center", OJSC "Soligorsk Institute of resources saving problems with pilot production", OJSC "Holding managing company "BELKOMMUNMASH", OJSC "Minsk research Institute of radio-materials", OPTRON instrument-making plant OJSC, MAZ OJSC-management company of BELAVTOMAZ holding the state scientific institution "Powder metallurgy institute", Belarusian state University of Informatics and Radio electronics.

A promising direction in terms of diversification of

production activities is the development of production of components for medical product (for prosthetic limbs, prosthetic joints, etc.). Within of the implementation of this direction, the enterprise cooperates with such enterprises as RUE “Belarusian prosthetic and orthopedic rehabilitation center”, CJSC “Altimed” and others.
